

ALT PERK TOKENS

ALTERNATIVE PERK TOKENS

If you want to play with this optional rule, there are **additional perks available for all vessels**, allowing for greater customization and build variety.

To use this new content, apply the following rules:

- During town phase, a player can spend 2 Legend Points from the party's stash to acquire the alternative perk token for their vessel.
- Once acquired, the token is placed over the top or bottom row of unlockable perks, effectively overwriting two existing perks.
- If the player already had perks unlocked when acquiring this token, they can now change (for free) which perks are active on each column.
